- Consistent Performance...The Right Amount Everytime

## Improving Patient Outcomes

## Safety—Quality—Integrity—Performance

## Swabsticks

### Sterile Povidone Iodine Prep

Broad-spectrum germicidal action, acting as a prophylactic anti-infective agent in hospital and office procedures, providing protection against possible infection. S-1101, single; S-3101, Triple

### Sterile Povidone Iodine Scrub

Microbicidal skin cleanser containing synthetic detergents. Helps remove body oils and contaminants. S-1102, single; S-3102, Triple

### Sterile Povidone Iodine Gel

Contains 10% Povidone Iodine, for broad spectrum germicidal action. Helps to minimize dripping or run off of prepping solutions. Approved as a one step procedure for venipuncture site preparation prior to blood and plasma collection. S-1138, single

### Sterile Tincture of Iodine

Recommended by the CDC as a highly effective topical antiseptic. Combination of alcohol and iodine facilitates fast drying and rapid action. S-1008, single

### Sterile Acetone Alcohol

Provides effective removal of fats and oils from the skin. Excellent wet strength and abrasive action. S-1104, single

### Sterile Alcohol

Contains a consistent amount of 70% isopropyl alcohol to ensure you can complete your procedure. S-1105, single

### Sterile Compound Tincture of Benzoin

Prepares the skin for maximum adhesion of dressings or bandages while minimizing tissue breakdown. Allows bandages to remain in place with less chance of curling or rolling. S-1106, single.

### Sterile Skin Protectant

Prepares the skin for improved adhesion of a dressing or bandage. When dry, it leaves a thin film on the skin's surface. This provides a clean surface and a barrier to the natural body oils that can affect the adhesion of a dressing or tape. S-1110, single.

## Prep Pads

### Sterile Povidone Iodine Pad

Povidone Iodine is virtually non-irritating to the skin, wounds or mucous membranes and is non-staining to skin or natural fabrics. P-1001, Medium

### Sterile Skin Protectant Pad

Prepares the skin for improved adhesion of a dressing or bandage. When dry, it leaves a thin film on the skin's surface. This provides a clean surface and a barrier to the natural body oils that can affect the adhesion of a dressing or tape. P-1010

### Iodine Remover Pad

Iodine Remover contains Sodium Thiosulfate which neutralizes the iodine and removes the color. It also contains Water and Isopropyl Alcohol. P-1017, Medium.

## Ampoule

### Povidone Iodine Ampoule

Glass ampoule, encased in a plastic tube that is sealed at one end, and has an absorbent applicator at the other end. The plastic tube is squeezed to break the ampoule to release the PVP-I which then saturates the applicator end. 82-278

## Ointment

### Sterile Povidone Iodine Ointment

A topical agent active against organisms commonly encountered in skin. It is virtually non-irritating, does not block air from reaching the site of application and can be bandaged. L-2001, 1gm.
