Antimicrobial Products

From our beginning in 1983, Apicare's focus has been to provide the highest quality topical antimicrobial solutions. Whether our products are used by healthcare professionals and their patients, or included as component parts in procedural kits and trays, every product stands up to the demands of today's healthcare setting.

Apicare's Povidone Iodine and Chlorhexidine Gluconate solutions are available in a wide variety of sizes. Our sterile unit-dose packages offer the safest possible delivery system for antimicrobial solutions. They ensure that the antimicrobial solution and the applicator will never be a source of infection. These packages include liquid pouches, swabsticks and prep pads. In addition, Apicare's unit-dose products include Skin Protectant, Compound Benzoin Tincture, Tincture of Green Soap, Iodine Stain Remover and Hydrogen Peroxide USP, 3%.

Many of the sterile procedural kits and trays offered by today's leading medical manufacturers feature Apicare products.

For more information or to place an order, call Apicare at 1-800-760-3236 or call your local distributor.

ANTIMICROBIALS

Povidone Iodine Paint Solution

This multi-purpose topical solution contains 10% Povidone Iodine USP, 1% available Iodine, for broad-spectrum germicidal action. Povidone Iodine Paint Solution is appropriate for pre-surgical patient preparation (as a paint, wet soak, or spray); disinfecting of wounds and burns; and emergency antiseptic treatment of lacerations and abrasions. It also acts as a prophylactic anti-infective agent in hospital and office procedures, providing protection against possible postoperative infection of incisions. Povidone Iodine Paint Solution is virtually non-irritating to skin, wounds, and mucous membranes and is virtually non-staining to skin and natural fabrics.

Povidone Iodine Topical Gel

This viscous antimicrobial contains 10% Povidone Iodine USP, 1% available Iodine, for broad-spectrum germicidal action. As a preoperative patient prep, Povidone Iodine Gel helps to minimize the pooling of prepping solutions under the patient, thus reducing the chance of patient burns. The Gel is also approved as a one step gel for venipuncture site preparation prior to blood and plasma collection. Povidone Iodine Topical Gel is film-forming, creating a desirable residual microbicidal action typical of PVPI which has been shown to be effective against gram-negative and gram-positive bacteria, fungi, viruses, protozoa, and yeasts. It is virtually non-irritating to skin, wounds and mucous membranes and is non-staining to skin and natural fabrics.

ANTIMICROBIALS

Povidone Iodine Scrub Solution

Our Povidone Iodine Scrub Solution is a gentle and effective surgical scrub with special detergents formulated to prevent dryness. It contains 7.5% Povidone Iodine USP, 0.75% available Iodine. Povidone Iodine is known to kill surface pathogens, including gram negative and gram positive bacteria, fungi, viruses, protozoa and yeast. It also produces a rich golden lather; appropriate for patient pre-operative prepping, as well as for pre- and post-operative scrubbing by medical personnel.

Chlorhexidine Gluconate Scrub Solution

This antimicrobial skin cleanser will not leave hands dry, cracked or irritated, even with frequent washing. It contains either 4% or 2% W/W Chlorhexidine Gluconate with 4% isopropyl alcohol in a non-alkaline base. With persistent antimicrobial action, CHG Scrub Solution attacks a wide range of microorganisms, including gram positive and gram negative bacteria, yeast and fungi. Also effective as a healthcare-personnel hand wash with 15-second wash. It does not contain red dye which may stain clothes.

ANTIMICROBIALS

Povidone Iodine Prep Spray

This multi-purpose topical solution contains 10% Povidone Iodine USP, 1% available Iodine, for broad-spectrum germicidal action. It is now available in a single use 2-oz. Spray bottle. The pump action, controlled spray mist provides an alternate method to the final step of the scrub/paint pre-operative patient prep procedure. The fine mist uniformly coats hard-to-access areas quickly. The prep solution can be applied to give an even coating that produces less runoff and pooling reducing the chance of irritation. The 2-oz. bottle covers a large area. It is designed and labeled as single use preventing the potential for cross-contamination. It also provides a no touch application for minor abrasions, lacerations, and burns.

Other Povidone Iodine Products

Whirlpool Concentrate provides effective disinfection of whirlpools and other hydrotherapy tanks at a ratio of 1 ounce per 20 gallons of water. It contains 10% Povidone Iodine USP, 1% available Iodine, a defoamer and buffering agents. The **Periwash Kit** includes an 8-oz. bottle of periwash concentrate which contains 10% Povidone Iodine with 1% available Iodine, and an empty periwash diluting and dispensing bottle. It reduces the risk of infection after surgery or childbirth, effectively cleansing the perineal area and helps reduce or eliminate offensive odors. **Empty Periwash Dispensing Bottles** are also available separately. **Douche** contains 10% Povidone Iodine USP, 1% available Iodine. It needs to be diluted and used as a broad-spectrum bactericide and cleansing douche to combat infection.

ANTIMICROBIALS

Antiseptic Alcohol Gels

Ideal for use by healthcare workers who come in contact with infectious patients, urine, blood or serum. Fast acting Aplicare Alcohol Gels are used between hand washings to kill a broad spectrum of pathogenic microorganisms quickly and effectively without the need for water. Designed for repeated use, these products contain conditioners and emollients to minimize skin irritation and offset the drying effects of alcohol. The gel formulation eliminates the mess and waste of liquid antiseptics. The convenient 4-oz. bottle fits easily in a lab coat or uniform pockets.

ANTIMICROBIALS

Saturated Swabsticks

Aplicare Swabsticks are packaged in easy-open, single-use, foil-laminated pouches, and each 4" swabstick is saturated with precisely the correct amount of solution. Wherever possible, we have taken the extra step of terminally sterilizing the contents of each package, thus ensuring the safest possible product for the patient. The **10% Povidone Iodine Paint and Gel**, as well as the **7.5% Povidone Iodine Scrub Swabsticks** have broad-spectrum germicidal action. Use these products for small-site skin disinfection, disinfecting wounds or minor burns, and emergency antiseptic treatment of lacerations and abrasions. **Acetone/Alcohol and Alcohol Swabsticks** may be used on intact skin when fast action and drying times are desired. **Compound Benzoin Tincture Swabsticks** may be used under adhesive bandages to improve adhesion. **Tincture of Green Soap Swabsticks** are an alkaline cleanser that help remove body oils and fats from the skin. **Iodine Tincture, 2% USP Swabsticks** combine ethyl alcohol and iodine, creating a potent disinfectant. **Skin Protectant Swabsticks** provide a thin film barrier to protect skin from irritation and can be used under dressings, adhesive tapes, casts, ostomy appliances, and male external catheters and is easily removed with soap and water. All swabsticks are conveniently packaged 10 boxes of 50 single swabsticks per case, or 10 boxes of 25 triple swabsticks per case.

PERSONAL CARE

Antibacterial Hand Soaps

A mild, non-irritating skin cleanser, **Antibacterial Lotion Soap** is rich and creamy. It is formulated to encourage good hand-washing practices in patient-care environments where cross contamination must be controlled. Its lather effectively removes dirt, dead skin and bacteria and is easily rinsed away. Emollients are added to condition and soften the skin. The formulation is mild enough for frequent hand washing and is pleasantly scented. **Physician's Antibacterial Soap** forms a thick, rich lather which results in a thorough cleansing, then rinses off easily. The mild formula promotes regular hand washing. The active ingredient in both of these formulas is Triclosan, known to inhibit the growth of bacteria.

PERSONAL CARE

Body Baths and Shampoos

Total Body Shampoo combines a body cleanser and a hair shampoo with conditioners into one convenient-to-use product. It offers generous lather with a gentle cleansing action, and features a pleasant, clean fragrance. Skin and hair are soft and smooth after use, and hair is extremely manageable. It can also be used as a lubricant before shaving. **Versatile Body Bath and Shampoo** is a skin cleanser, mild shampoo and bath additive all in one. It lathers quickly, cleaning skin without drying or irritation. It also provides mild conditioning for skin and hair.

PERSONAL CARE

No-Rinse One Step Products

When caring for non-ambulatory patients, One-Step cleansing products are the ideal solution. Formulated to clean effectively, they are so gentle that rinsing is never required. They leave hair and skin soft and supple.

One Step Body Bath is a cost-effective, space saving concentrate. It is easy to use, simply dilute 2 oz. body bath with 1 quart of water. It is applied with a washcloth and towel dried. As a concentrate it takes up less shelf space. **One Step Shampoo** is patient ready, apply it directly to the patient's hair, massage in, and towel dry. It leaves hair manageable and easy to comb.

PERSONAL CARE

Baby-Care Products

Baby Lotion is an all-purpose hand and body lotion. The non-irritating formula dries rapidly, leaving a non-greasy film which helps prevent loss of skin moisture. **Baby Shampoo** leaves hair soft, shiny and easy to manage. **Baby Bath** uses its rich lather to gently clean and leaves a pleasant baby-powder fragrance. Apply all-purpose **Baby Oil** to skin after bathing and at diaper changes to help prevent dryness and chafing. **Baby Powder** is made from the finest talc so it relieves irritation and prevents chafing. **Cornstarch Baby Powder** is absorbent and talc-free. Silky powder protects skin against the irritating wetness that can cause diaper rash.

PERSONAL CARE

Perineal Washes

Perineal Wash with aloe and lanolin is a ready-to-use, no-rinse formula for thorough perineal cleansing. Its pH-balanced detergent quickly dissolves solid wastes, helping to reduce odors. It may also be used to clean bed linens, stoma sites and ostomy appliances. **Antiseptic Perineal Wash II** is a medicated perineal cleanser and deodorizer. It provides superior odor control and is virtually non-irritating to the skin and mucosa. **The PVP Periwash Kit** includes an 8-oz. periwash concentrate which contains 10% Povidone Iodine USP, 1% available Iodine* and an empty periwash diluting and dispensing bottle. It reduces the risk of infection after surgery or childbirth, effectively cleans the perineal area and helps reduce or eliminate offensive odors. Empty **Periwash Dispensing Bottles** are also available separately.

*Before dilution

Prefilled Phosphate Enemas

The Phosphate Enema relieves constipation, cleanses bowel before rectal examination and removes residue following barium enemas. It is ready to use, eliminating the need for messy mixing. A protective shield over pre-lubricated tip prevents contamination and ensures adequate lubrication for easy insertion. A one-way safety valve prevents back flow. The soft bottle facilitates easy dispensing of liquid. Available in tamper evident sealed boxes with instructions or in bulk.

Procedural Tray Component Products

In 1983, our initial products were developed to meet the specific needs of the procedural kit and tray manufacturers. Beginning with flexible packaging materials made of multi-layered foil to ensure integrity. Continuing with excellence in product and process validation and ending with strict performance testing, these products are made to be a reliable and repeatable component in your tray. Wherever possible, we have taken the extra step of terminally sterilizing the contents of each package, thus ensuring the safest possible product. Many of the sterile procedural kits and trays offered by today's leading medical manufacturers feature Aplicare Products.

For more information or to place an order, call Aplicare at 1-800-760-3236 or your local distributor.

Liquid Pouches	19
Bottled Povidone Iodine	20

COMPONENT PRODUCTS

Swabsticks

Single and triple swabsticks packages are available in different solutions for skin prepping procedures. We use special processing designed to reduce air in packaging, eliminating the possibility of bursting the package seams. Our products are made to be a reliable and repeatable component in your kit or tray given that we begin with product and process validation and end with strict performance testing. Our multi-layer foil laminate packaging material is designed to withstand the rigors of ethylene oxide sterilization. We provide certification of sterility, chemical analysis, and compliance with seal integrity with every lot. For kits where space is limited, the 2.5 inch swabstick is an excellent alternative to the standard 4-inch swabstick. The head of the swabsticks is the same size as our regular swab but the stick and package have been reduced to allow it to fit in a smaller overall kit.

Part #	Description	Case Qty
Single Swabstick

The Following are Some of the More Popular Trays That Include These Components

- Dressing Change Trays
- IV Start Kits
- Central Line Dressing Change Trays
- PICC Trays
- Catheterization Trays

COMPONENT PRODUCTS

Prep Pads and Towelettes

Available in a variety of liquids, prep pads and towelettes offer an alternative applicator for antimicrobial solutions. The medium-sized prep pads, measuring 1.25" x 1.5", are designed to prep small areas and are a competitive alternative to swabsticks and other applicators in cost sensitive kits and trays. Towelettes measure 5.5" by 6", unfolded, and are used to cleanse larger areas. Wherever possible, we have taken the extra step of terminally sterilizing the contents of each package, thus ensuring the safest possible product. Prep pads and towelettes are packaged in a material designed to hold up to the rigors of ethylene oxide sterilization, ensuring the package and tray integrity.

Part #	Description	Case Qty.

The Following are Some of the More Popular Trays That Include These Components:

- IV Start Kits
- Dressing Change Trays
- Irrigation Trays
- Instrument Trays
- Clean Catch Kits

COMPONENT PRODUCTS

Saturated Stick and Wing Sponges

The pre-saturated stick and wing sponges are packaged with Povidone Iodine Paint and Scrub solutions. Using these products eliminates the bulk of bottles, sponges, and basins in a preoperative skin scrub tray, resulting in compact easy-to-store kits. The 10% Povidone Iodine USP Paint or Scrub, 1% available Iodine, has a broad-spectrum antimicrobial action. The Povidone Iodine Paint acts as a prophylactic anti-infective agent and also provides protection against possible post-operative infections.

As the final step in the manufacturing process, the contents of the pre-saturated stick and wing sponges are terminally sterilized, ensuring the products are free of contamination and will not be a potential source of infection.

The unique laminated foil packaging materials and the precise sealing mechanism used in our manufacturing process results in a package that will withstand the vacuums and elevated temperatures used in ethylene oxide sterilization of the final kit.

Part #	Description	Packaging	Case Qty.
F-2001-5S*	Sterile Eight Inch Stick Sponges Saturated with Povidone Iodine Paint	.2/packet	.50
F-2002-5S*	Sterile Large Wing Sponges Saturated with Povidone Iodine Scrub	.2/packet	.50

- Skin Scrub Trays
- Cardiac Catheter Trays
- O.R. Procedure Trays

COMPONENT PRODUCTS

Liquid Pouches

Liquid pouches are available in a variety of sizes and solutions. The one-ounce pouch is the standard for most solutions. The two and four ounce pouches are gusseted to save space and will stand upright to provide a stable package when opened. The 3/4 ounce pouch provides an economical alternative to the one-ounce pouch and is acceptable for use in most urological and spinal anesthesia procedural kits. These are used frequently in skin scrub trays as an alternative to bottles. We also offer one gram packets of **Povidone Iodine Ointment** and three and five gram packets of **Lubricating Jelly**. This wide selection of products and package sizes gives you the ability to meet the specific requirements of a variety of procedural kits.

By vigorously testing our unique packaging materials, we've virtually eliminated the concern over leaking packets during the kit sterilizing process. This provides you the assurance you need when producing procedural kits and trays that are worth many times the cost of the components.

The Following are Some of the More Popular Trays That Include These Components:

- Urological Procedure Trays
- Skin Scrub Trays
- Dressing Change Trays

COMPONENT PRODUCTS

Bottled Povidone Iodine

Using an innovative one-piece cap and custom molded bottle, Aplicare 2 and 4 ounce bottles are designed specifically to meet the needs of procedural kit and tray manufacturers. The bottle itself has been custom molded to Aplicare specifications to match the cap perfectly. The result is a bottle capable of withstanding deep vacuum ETO cycles. Each lot is subjected to rigorous biological testing to ensure the safest possible product. As a cost saving alternative, we offer a 4 oz. bottle filled with 3 oz. of Povidone Iodine Paint Solution for those procedures that do not require the additional solution. These products have broad-spectrum germicidal action and contain either 10% Povidone Iodine USP, 1% available Iodine, or 7.5% Povidone Iodine USP, .75% available Iodine. These solutions also act as a prophylactic anti-infective agent, providing protection against possible postoperative infection of incisions. Povidone Iodine Paint and Scrub Solutions are virtually non-irritating to skin, wounds and mucous membranes and is virtually non staining to skin and natural fabrics.

Ordering Information

Aplicare serves the acute-care, extended-care and alternate site markets through national, regional and local healthcare distributors. Please contact your preferred distributor and request Aplicare products. If they do not currently stock Aplicare products, please contact us. We will recommend alternative sources in your area or attempt to establish a relationship with your preferred distributor. Aplicare services procedural kit and tray manufacturers directly.

If you would like to place an order, have questions answered, need MSDS sheets or samples, please use one of the following methods to contact us.

Phone

Toll-Free 1-800-760-3236 or (203) 630-0500

Our customer service representatives are available to take your call Monday through Friday from 8:30 a.m. to 5:00 p.m. Eastern Time.

Fax

(203) 630-4876

Send us your order when it's convenient for you. Our fax machine is ready 24 hours a day, 7 days a week.

Mail

Aplicare, Inc.
